

6-1 已知一立体的主视图和俯视图，补画左视图、右视图、仰视图和后视图，并按基本视图配置。

6-2 按照箭头所指的方向，在指定位置画出相应的向视图。

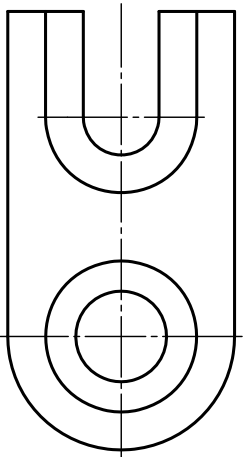

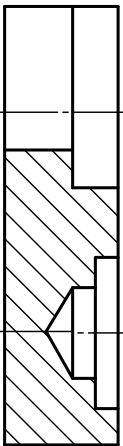

6-3 如轴测图所示物体，已知其主视图，用局部视图和斜视图将未表达清楚的部分表达清楚（尺寸由轴测图中按1:1量取，并取整数）。

The main view is a front view of a mechanical part. It features a central rectangular section with a square hole. To the left is a semi-circular protrusion, and to the right is a rectangular protrusion with two circular holes. Section lines A-A and B-B are indicated with arrows. View A is a partial view showing the semi-circular end. View B is a partial view showing the two circular holes. Below the main view is an isometric drawing of the same part, showing its 3D structure. The isometric drawing includes a semi-circular end with a radius of R6 and a rectangular base with a radius of R8.
